

Big Bore Tubing Packer

OVERVIEW

The Logan Big Bore Tubing Packer is designed to provide a leak-free seal inside a tubing string with a bore larger than other tubing packers. It can run as a tension packer or a “hook wall” compression packer. It has left-hand safety threads at each end in case it becomes stuck.

Options include a double element packing system along with box or pin connections at either end. Various tubing connections are available. This Logan Kline Tools Big Bore Tubing Packer can also be used as a tension anchor by replacing the packing element with a steel sleeve.

Size (in)	Weight (lbs)	Gauge Ring OD (in)	Packer Bore (in)	Connections
2.875	6.4 – 6.5	2.281	1.50	1.900 NU10Rd
3.500	7.7 – 9.3	2.812	1.75	1.900 EU10Rd
