

MultiStim Fracture Isolation System MultiPlug Composite System

- Available for 3-1/2", 4-1/2", 5-1/2" and 7" casing sizes
- One tool — multiple configurations:
 - Ball Drop Frac Plug
 - Flowback Frac Plug
 - Bridge Plug
- 6 – 10,000 psi rating from above
- 250 – 300°F temperature ratings
- Sure setting in up to P-110 grade casing with hardened wicker ring slips

The MultiPlug System provides short-term wellbore isolation for vertical or horizontal well applications.

The MultiPlug design provides positive setting with hydraulic setting tools or with plug and perf applications on either the Baker or GO electric wireline setting tools.

The wicker hardened ring slip design ensures positive setting in up to P-110 grade casing. This slip design also facilitates MultiPlug removal by eliminating plug creep potential and skidding which may occur with slip or button insert slip designs. This unique slip is designed to reduce the amount of non-composite material in the MultiPlug construction.
