

Overview

The Logan Casing Brush tool is a high performance well clean-out tool designed to save time and improve the effectiveness of clean-up operations in vertical or horizontal wells. Using the same proven rugged design and easy maintenance as the Logan Casing Scrapers, the Logan Casing Brush helps maintain obstruction-free casing. The splined body locks each blade into an integral part of the body to insure absolute safety and security.

- Maximum cleaning surface with two sets of wire brushes
- Cleans the casing running in and pulling without rotation
- Compatible to run with Logan Casing Scrapers and Logan Junk Subs
- Wire Brush blocks interchangeable with the Casing Scraper blade blocks

Casing Brush	Part No.	Casing			
		Size	Weight (ppf)	Minimum ID (in)	Maximum ID (in)
4-1/2"	518-361	4 1/2"	9.5 -15.1	4.090	3.826
		5.0"	18	4.276
